

CODE EXERCISE

BASIC DOCUMENT STRUCTURE

In your text editor, create a web page with correct basic document structure that outputs your name, where you live, and something interesting about you. Save your document correctly with an .html extension on the filename.

Load the page in to your browser to ensure that it displays correctly. If the page does not display correctly, check your code carefully for any errors. Keep in mind that a single misplaced character can cause your content to display incorrectly, or not at all in the web browser.

SUBMITTING EXERCISES

To earn certification all exercises must be submitted and accepted.

1) When you've completed all of the HTML exercises, please zip them into a single file and submit to our Dropbox at <http://bit.ly/CWDP2324>.

2) Next, fill out the certification completion form at <https://forms.gle/5EiUGCM6dGdIF2Py6>.

Remember, that all of your exercises for each module should be included in a separate zip file.

GETTING HELP

We always want to ensure that your questions are answered. There are a number of ways to get in touch.

1) We operate a lively Discord server. Join us at <https://discord.gg/tgxX2fCrv5> and you can ask your question on Discord. Mark and our team of instructional assistants monitor this Discord and answer questions ASAP.

2) This certification program is offered on several platforms. Most platforms have a Q & A section where you can post questions. We monitor these and respond as quickly as we can.

3) You may use our question hotline email at questions@dollar.designschool.com.

Remember to always to include which section your question is from and send any code you're working on!
